# Ethics and Security Aspects of Infectious Disease Control

Interdisciplinary Perspectives

Edited by **Christian Enemark**, The Australian National University, Australia and **Michael J. Selgelid**, Monash University, Australia

*'An excellent composition of scholarly analysis and reflection.... It has the potential to become a standard reference work.'*  
– Ole Döring, Charité Universitätsmedizin, Berlin, Germany

*'This edited collection provides a novel multidisciplinary analysis of the dilemma... a constructive and worthwhile contribution that is accessible to both academics and policy makers.'*  
– Sara Davies, Griffith Asia Institute, Griffith University, Australia

*'...an outstanding contribution...It must be read by the wide audience involved in these issues - policy makers, academics, physicians and scientists, and the general public.'*  
– Harvey Rubin, University of Pennsylvania, USA

*'...essential reading for both practitioners and academics interested in this field.'*  
– Colin McInnes, Aberystwyth University, UK

*'...a comprehensive overview of the ethical, security, economic, and health challenges that disease outbreaks present... in a clear, lucid, and easily understood manner.'*  
– Jeremy Youde, University of Minnesota Duluth, USA

*'...this volume could not be more timely or relevant as it examines the intricate, complex and difficult issues at the interface of bioethics and security as related to infectious disease control. It is essential reading for all involved in global public health and infectious disease control.'*  
– Ross Upshur, University of Toronto, Canada

Research on ethical issues associated with infectious disease is a relatively new and rapidly growing area of academic inquiry, as is research on infectious diseases within the field of security studies. This volume incorporates ethical and security perspectives, thus furthering research in both fields. Its unique focus on the intersection of ethical and security dimensions will, furthermore, generate fresh insights on how governments should respond to infectious disease challenges.

**Contents:** Introduction, *Christian Enemark and Michael J. Selgelid*; The concept of security, *Jonathan Herington*; The value of security: a moderate pluralist perspective, *Michael J. Selgelid*; HIV/AIDS, security and ethics, *Michael J. Selgelid and Christian Enemark*;

Filth and failure: the security politics of cholera, *Christian Enemark*; Securitizing epidemics: three lessons from history, *Stefan Elbe*; The disappearing act of global health security, *Niamh Stephenson*; Extending ethical justification for public health surveillance to situation awareness, *Lisa M. Lee*; Electronic surveillance for communicable disease prevention and control: health protection or a threat to privacy and autonomy, *Gwendolyn L. Gilbert*; Ethics of research in epidemic response, *Andreas Alois Reis and Ronald Kam FaiFung*; Media ethics and infectious diseases, *Claire Hooker, Julie Leaske and Catherine King*; Ethics and indigeneity in responding to pandemic influenza: Maori values in New Zealand's emergency planning, *Louise Delany*; Governance, rights and pandemics: science, public health or individual rights?, *Terry Carney and Belinda Bennett*; Index.
